

CALL FOR CLEANUP of COAL ASH

Dear Decision Makers,

I SUPPORT the immediate remediation of the Duke Energy coal combustion waste spill at the Dan River Power Station near Eden, NC through removal of coal combustion waste from the river, streams, and creeks that have been negatively impacted.

FURTHERMORE, I support the removal of coal combustion waste stored at **ALL** coal combustion waste ponds near **ALL** waterways in the Dan River Basin.

North Carolina should immediately follow the lead of South Carolina and require that toxic coal ash be moved to dry, lined storage away from our waterways.

I URGE YOU TO PASS LEGISLATION that forces the cleanup of these dangerous coal ash ponds.

Sincerely,

Name
