Dr. Lindley Butler, a leading river historian, noted, “William Byrd’s survey in 1728 drew a line across the watershed, but we are reaching across that line to build a new community.”

According to T Butler, the first installment of the grant money has been received by the Association, freeing the group to begin its search for a director of Virginia programs.

Ellen Jessee, who serves as chair of the Martinsville-Henry County group, stated, “We are extremely excited to have this funding for a staff member who can help make more things happen in our area. It will be great for the community.”

In his letter to DRBA, Cerino praised “the important work that the Dan River Basin Association has done to inspire and galvanize the residents of our community to both protect and utilize in a sound manner our natural resources.”

Additional grant proposals have been submitted to support further programming in Virginia and full-time staff in North Carolina.

“The Martinsville-Henry County Rivers and Trails Group and the Dan River Basin Association have developed an ambitious agenda for the next several years,” said Tom Edmonds, DRBA President. “We’re proud of our record so far in DRBA’s brief three plus years of work, and we’ll welcome the skills of our professional staff and continue to value the work of our dedicated volunteers as we pursue an ambitious agenda.”

“I think we’re in agreement,” added T Butler, “that in working on local projects, we’re all dedicated to making that state line as invisible to us as it is to the rivers.”

Submitted by Forrest Altman
Thus has been my dilemma with the demons. Self-doubt says, "Why did I say I would write this piece?" Flattery replies, "Other than the three people who asked?" Malice and Vengeance plotted finding Trent and force feeding him that camera. Honor insisted we keep our word. Discretion gets all haughty thinking about being associated with Shakespeare, Falstaff and being the better part of Valor.

It rained the night before. Not a good omen. Primal Fear was jumping up and down having a fit in the car seat as we passed the red raging river of the Boiling Hole at Anglin Mill. She got a little quieter after we stood around watching the river rush by. She got mad at Distraction and went to sulk in the backseat.

After lots of form signing, vessel arranging and reassurance from our guides, Sammy Allred, Trent Fentress, and David Mabe, the shuttle from Three Rivers arrived. Steve drove us to Moore’s Mill Road Bridge on the North Fork of the Mayo in Henry County, VA. There we had to drop the sixteen watercraft down a sheer embankment where they could then be dragged to the river. That was the easy part. Dropping the twenty persons of various ages, physical abilities and mental capacities was a different matter. My experience involved vines around the ankle, a big rock and a near face first slide. Got the vines off the ankle, re-aligned, only to hit the now slick mud and get the wind knocked out of me as I coasted down the embankment.

As we started down the river, two large dogs decided to follow us. The Big Brown Dog shot the rapids sans canoe, something he may do on a regular basis on a normal day. During the previous night’s rain, the river had risen four feet. It had gone down two before we set out that morning. Big Black Dog was on the bank sounding very concerned for his friend. Bit further down stream the dogs found a man and a truck that they were very happy to see, thus ending their adventure with us.

Discretion now says that here we should say:
Everybody got wet.
Carolyn, the fish girl, had a good time.
Everyone was highly impressed with our guide, David Mabe, who may not be old enough to drive, but showed much more maturity and rationality than some of us.

Holding on to your boat is NOT an absolute. Sometimes it is better to let the blasted thing go over the rapid, cause when it rights itself, it may be full of water. A gallon of water weighs just over eight pounds. A fully loaded tandem canoe weighs equivalent to a midsize hippo and responds equally as well.

While in the river, if given the choice, climb up on the rocks. You may be safer there and maybe can walk down stream before reconnecting with your vessel.

Never travel without an EMT/firefighter or pocket lint covered painkillers.

During the lunch stop, when many people ask you if you will write the bit for the newsletter, say you will think about it.

Back at work at Tryon Palace on Tuesday, the CI staff (character interpreters) were having a whining competition for most injuries sustained over the 4th of July holiday. They had bruises, knots and swollen knees from playing rounders (early lawn bowling) and cricket (early baseball) with Governor Tryon’s guests. I won the whining contest because my injuries were more vividly colored, more painful (hence the sucking of air from the pulled muscles) and more visible.

"Swingin' Along . . . in the Fall of the Year"

A Symposium About
"Connecting the Commonwealth"

HIKING AND LEARNING WITH TRAIL AFICIONADOS TRAILS AND QUALITY OF LIFE TO BE DISCUSSED AT OCTOBER 28 SYMPOSIUM

The nights are chill, red leaves are flying, and my feet are itching to pull on boots and hit the trail—any trail from Rocky Knob Recreation Area to Staunton River State Park, or anything between: Mt Rogers, Fairy Stone, the Aqueduct Trail in Pinnacles Park, Hanging Rock, White Oak Mountain.

I'd like to see all of them connected, and so would the planners of the West Piedmont Trails Symposium October 28, at the Conference Center of the Institute for Advanced Learning and Research on US 58 west of Danville. I'd like every child in my county to be able to walk or ride her bike to school or to the library without crossing a road.

Wordsworth was right: "the world is too much with us." We need to feel the breath of the wild wind, the scents of spring and fall, the feel of earth under our feet. We need to be able to get from here to there without exhaust fumes and without depleting the planet's costly, non-renewable resources. So say the planners of the Trails Symposium.

One of the speakers on the program, David Crockett (descendant of that other Davy), with a long resume in business, has become an authority on sustainability. Another, Tom Hirsch of Damascus, opened six businesses based on the influx of tourists attracted to the Virginia Creeper Rail-Trail.

Trail efforts in the Dan River Region are swingin' right along. The new Rivers and Trails group of Martinsville-Henry County, an affiliate of the Dan River Basin Association, has a grant to develop a trail from Fairy Stone Park to the town of Bassett. Danville, of course, under the leadership of Outdoor Director Karen Cross, is a leader in urban trail development, and Virginia's newest rural "open road," the Tobacco Heritage Trail, dedicated its first 4-mile segment (of a proposed 48 miles) early in September with a ribbon-cutting by Governor Mark Warner, whose initiative helped spark the effort.

Continued page 6

"What a day!"

Under a clear blue sky on Saturday morning, September 3, DRBA members gathered at Anglers' Pride Park in Danville, VA to board the batteau Dan River for an eleven-mile excursion through Pittsylvania and Caswell counties to Milton, NC. With seating limited to 20, the reservations had closed weeks ago, and DRBA members Milton Hundley, Wayne Kirkpatrick, Ben Pruitt, and Ken Yates had volunteered to help man the poles and sweeps. Accompanying the batteau were 20 canoes and kayaks. With a total of about 60 participants, it was the largest DRBA outing yet.

This section of the 200-mile-long river is the only one accessible by public access points for a craft of this size that can be run in a day. What a tourism asset for Danville and Caswell County!

Tempered by a light breeze under a warm sun, the batteau was poled out into clear green waters for its second voyage from Danville to Milton—only the second on this section in over a century. (The first was in the spring of 2003.) The accompanying flotilla of brightly colored boats quickly spread out all along the route, which flowed between tree-clad banks that gave a sense of wilderness. Great blue herons lifted from the river from time to time; scolding kingfishers darted around the craft; a startled deer crashed back into forest shadows; and a turtle and a water snake dived below the surface as we passed.

Between the two river ports are six stone structures, built as part of the historic sluice navigation system that enabled the batteau to clear rock ledges and rapids. Some are located at historic crossings, and several are modified fish weirs originally constructed by Native Americans possibly over a thousand years ago and then widened for batteaux by the Roanoke Navigation Company in the 1820s.

During our trip, three of the navigation structures were visible. At Dix's Shoal Sluice near the mouth of Hogans Creek, Jeff Johnston and Mark Bishopric deftly threaded the eight-foot-wide batteau through standing waves in the ten-foot-wide sluice to eddy up below the gravel island and join the rest of the boaters for a leisurely lunch break and a photo by videographer Kelly Martin.

At Wilkinson's Shoal Sluice the long stone angle was evident, but the batteau had a clear passage on river right. However, at Dodson's Shoal Sluice, an ancient double-vee fish weir, the batteau approached cautiously, striking a submerged rock at the opening. The sweepmen, Milton Hundley and Captain Jeff Johnston, quickly spun the vessel in place, freeing Dan River to enter and slip through the right-hand narrow sluice. The skillful boat handling in the swift current and rocks brought cheers from passengers and onlookers.

The final excitement of the day came at the Milton Access when the batteau missed the turn at the landing, drifted below the bridge, and had to be hauled back through the rushing water by rope. The passengers disembarked under the bridge on the bank, much as they would have done 150 years ago.

All agreed that although the trip was long, the pleasures of a beautiful day, the companions and conversation on the batteau, and the excitement of running the sluices made it a great experience.

Look for future excursions sponsored by DRBA as we partner with Three River Outfitters to bring batteau navigation back to the Dan River, restoring a lost and important part of our past to citizens of the 21st century. Submitted by Lindley Butler

(see photos page 3)
**Treasurer’s Report:** Lindley Butler recommended that DRBA offer a $1000 grant to Eden’s 2005 Riverfest, scheduled for September 10, to be used for heritage activities pre-approved by a DRBA committee. The Board approved the request and appointed Lindley Butler, Julia Pyron, and Jeff Johnston to serve on the committee.

Lindley Butler recommended that he and Julia Pyron explore the possibility of offering ball caps and polo shirts embroidered with DRBA’s logo as new sales items. The Board approved their researching these items.

Julia Pyron suggested that DRBA use the $500 Spring Clean award to purchase a printer that can be used for the newsletter and sales items such as notecards. After some discussion, the Board decided to postpone such a purchase until we know whether we receive funding for offices and staff.

**Grants:**

- Andy Talbert has offered to solicit a $1000 grant from Procter & Gamble, which the Executive Committee recommends be designated for educational display materials. T Butler will work with Andy to prepare the proposal.

- Mike Vaughan, who now chairs the Grants Committee, is administering the Chincoteague Trail grant from Annie Penn Community Trust.

- Lindley Butler distributed copies of the new Dan River Batteau Navigation Trail brochure, which was funded by a grant from the Rockingham County Tourism Development Authority.

- Kay Slaughter, T Butler, Will Butler, Mike Vaughan, and Lindley Butler have prepared grant proposals submitted in June and July to Harvest, Public Welfare, and Z. Smith Reynolds foundations for staff and offices in Virginia and North Carolina. We have requested $47,500 per year for two years from Harvest, the same from Public Welfare, and $85,000 per year for three years from Z. Smith Reynolds. Decisions will be made in the fall for next year.

The Board discussed changes that will occur when we do have professional staff.

Ellen Jessee reminded us of Ben Murdock’s caution that we be extremely careful to hire staff members whose goals match ours.

Tom Edmonds pointed out the wisdom of documenting our activities in a systematic way to retain organizational memory and make it easy to enumerate what we have accomplished as we solicit funding. He commented that raising money from the region’s businesses and industries should not be difficult, since we are clearly working for the good of the basin’s citizens.

**Stream Monitoring:**

- Ken Bridle reported that 24 volunteer individuals or groups have signed up for NC Stream Watch, with several from outside the basin. The forms are available on the web page. Training is needed, and Ken will try to schedule a workshop at Hanging Rock State Park for the western part of the basin and another in the east.

- Brenda Martin suggested that an SOS trainer be engaged to certify more volunteers in the Virginia part of the basin. Tom Edmonds commented that the committee has considerable autonomy to set up training as they see fit.

**Display Committee:**

- Dorcas Midkiff sent a written report. Wayne Kirkpatrick borrowed the computer and projector and the display units from the Eden City Hall for a Rotary Club presentation in Stuart and wants to use them again for the Patrick County Fair in September. The display that was at the NC 29 Visitor Center will be stored at Three Rivers Outfitters. Larry Willard and Mike Covey have provided bateau models to accompany the photographic displays.

**Festival Committee:**

- Julia Pyron solicited volunteers for the following festivals in August and September: Dan River Boat Race in Madison on Aug. 6; Eden Riverfest on Sept. 10; Stokes Stomp in Danbury on Sept. 17-18; Brightleaf Hoedown in Yanceyville on Sept. 24-25.

- The Madison-Mayodan Recreation Department’s Dan River Race will once again be our August First Saturday Outing. DRBA cosponsors the race and will have a booth and provide safety for the race. The Board agreed that DRBA is now large enough to schedule a separate event for the August outing in addition to the race.

**Annual Meeting:**

- Ellen Jessee reported that high water levels caused some scrapes and several capsizes on the North Mayo in July, although our guides did an excellent job. Safety issues were discussed, with agreement that we need a policy about canceling a trip, a designated safety person with first aid and CPR skills, and a first aid kit and cold packs. T Butler will contact Will Truslow with these concerns.

“Connecting the Commonwealth” Symposium continued from page 4

Over and over I’ve become burnt out with attending meetings, but I’ll attend the Trails Symposium.

Why? A morning of experts telling us what trails do for the community and how to build them. That packet of information, in a neat canvas bag labeled “VIRGINIA IS FOR LOVERS.” An afternoon stroll on the urban Riverwalk Trail or the rural Ringgold-Sutherlin Rail-Trail with trail aficionados regaling me with information and sharing their enthusiasm. And the price! A mere $15 (thanks to the generosity of the sponsors) for program, lunch and a chance to check out the new conference center! I wouldn’t miss it-and I live in Carolina!

You can get additional information from Karen Cross at Danville Parks, Recreation & Tourism, 434-799-5215, crossks@ci.danville.va.us; from Jennifer Wampler at the Virginia Department of Conservation & Recreation in Richmond, 804-786-9240, jennifer.wampler@dcr.virginia.gov; or from Robert Dowd at West Piedmont Planning District Commission in Martinsville, 276-638-3987, rdowd@wppdc.org

Dan River Basin Association
Volunteer Stream Monitoring

Supplemental Directions for Stream Watch Activity

We would like a minimum survey of one stream per volunteer. Although you may do as many as you like. Try to pick named perennial creeks (usually third order) or direct tributaries of the Dan River. Small first and second order streams may not provide consistent data. Surveys of the Dan River itself might also be conducted.

North Carolina and Virginia participants are both needed for this effort.

Each stream should be checked twice a year, more frequently if there is a notable problem. If you find something that you think might be a serious problem call Ken Bridle (336-591-5882).

1. Identify your Survey Stream(s) on a Vicinity Map
   a. Large scale, showing nearest town or major road intersection.
   b. Can be hand drawn or copy of road map
2. Identify your Survey Stream(s) on a Site Map
   a. This is more detailed and smaller scale
   b. USGS Topographic Map is best
   c. A few narrative lines that could be used by someone unfamiliar to find the site.
3. Copy the Stream Watch Forms, so you will have a continuing supply.
5. Mail your completed forms to: Ken Bridle
   1160 Ralph Tuttle Road
   Walnut Cove, NC  27052

I will compile a data base of this information and pass the forms on to NC DENR and VA DEQ. I will also produce uniform USGS maps (1/24000 and 1/100000) and aerial photos (1/1200) of each sample site and a GIS data layer of the entire study.

You will find the Steam Watch Data Form on the Dan River Basin web site at www.danriver.org.
The Dan River Basin Association

To preserve the Natural and Cultural Resources of the Dan River Basin by promoting Stewardship, Recreation and Education

Though government has an important role to play in meeting the many challenges that remain before us, we are coming to understand that no organization, including government, will fully succeed without the active participation of each of us. Volunteers are vital to enabling this country to live up to the true promise of its heritage.

President Bill Clinton
